EDUCATION

- | | | |
|---|-----------|-----------------------|
| • Bachelor of Computer Science , VIT Bhopal University | CGPA 8.33 | September 21 –Ongoing |
| • Class XII , Sky Heights School, Betma | 80% | March 21 |
| • Class X , Advanced Academy, Indore | 75.6% | March 19 |

CERTIFICATIONS

- | | |
|--|-------------|
| • AWS Cloud Practitioner Certification | February 24 |
| • Google Cloud Digital Leader | February 24 |
| • Cyber Security Essentials, Cisco | June 2022 |
| • Applied Machine Learning in Python, Coursera | March 23 |

SKILLS

Technical Skills: ReactJs, Machine Learning, Neural Network Python, Matlab, TensorFlow, C++, UI/UX, Cloud Computing, CSS, SQL, flask, MS Office, PowerBI, AWS, Classification, Pytorch, Regression, Neural Networks, NLP, Business process analysis, Model development and prototyping

WORK EXPERIENCE

1 Data analyst Intern VMSK Retail (Hybrid), January 24 - June 24

- Evaluated data sets of over 1 million records, identifying trends that boosted operational efficiency by 20%
- Built 15+ dashboards enhancing data visualization and facilitating decision-making processes for a 30% improvement in strategy effectiveness.

2 AI Intern at DevBytes Private Limited, July 24 – September 24

- Engineered and executed a recommendation model to boost user engagement, tailoring experiences for improving retention by 40%.
- Performed strategic competitor analysis and validated software testing, delivering actionable insights that strengthened DevBytes' market position and enhanced the quality and competitiveness of platform features by 45%. (<https://devbytes.co.in/>)

3 Data Scientist Intern at Zeke Labs, October 24 – December 24

- Performed data analysis and augmentation, enhancing data quality by 35% for improved Large Language Model (LLM) performance.
- Contributed to LLM optimization through machine learning-driven data processing and SQL-based fine-tuning, increasing model accuracy by 30% and strategic application effectiveness by 20%. (<https://www.zekelabs.com/>)

PROJECTS

1 Image Blitz- Photo Enhancer (November 2022 – February 2023)

- Description: Led the development of a photo enhancement system using state-of-the-art CNN technology, revitalizing vintage and blurred images with a 90% improvement in visual clarity, energizing outdated visuals
- Worked with a team of 5 to implement advanced machine learning techniques and CNNs, resulting in a 35% reduction in processing time and a significant boost in image quality
- Spearheaded full stack development, integrating ML with HTML, CSS, JavaScript, Flask, and SQL for sturdy backend functionality, enhancing user experience and processing speed by 21%.
- Link and Results: github.com/sunnyshin8/image-blitz

2 NOOR - brain tumor detection website (July 2022 – October 2022)

- Description: Led the development of a CNN-based brain tumor detection system using HTML, CSS, JavaScript, Flask, and SQL, achieving a 95% accuracy rate in early detection and providing over 1,000 free screenings, significantly raising health awareness
- Worked with a small group to implement advanced deep learning and DCNN technologies, resulting in a 30% improvement in detection speed and system reliability, enhancing real-time diagnostic capabilities
- Integrated machine learning and SQL for robust backend functionality, facilitating timely diagnosis, increased accuracy upto 97.3% and improving patient outcomes through the innovative platform noor.software

CO-CURRICULARS

- Maintained an impressive 100+ day streak on GitHub, showcasing commitment to daily challenging coding in Python, deep learning, Flask, and the MERN stack. This consistent effort reflects a continuous drive for personal and professional growth

EXTRA-CURRICULARS AND ACHIEVEMENTS

Achievements

- Published 8 research papers in prestigious international conferences, including 3 in Springer, 2 in IEEE, and 3 in open journals, demonstrating a high level of expertise and contribution to the field, Member of Editorial Board at [Impact Journals](#).

Responsibilities,

- Served as President of Cyber Warriors Club, COO of Tedx VIT Bhopal Chapter, and R&D Lead for Android Club and Superposition Bhopal, increased number of high-impact events by 200%, driving innovation, fostering collaboration, and ensuring seamless execution across diverse technical and community-focused initiatives

Extracurricular

- Achieved 9th rank in Microsoft's Code Titan hackathon, showcasing exceptional coding abilities in a highly competitive environment
- Completed 45 badges and earned 13,900 points in Google Cloud Skill Boost, attaining Silver League status, demonstrating extensive expertise and commitment to cloud technologies
- Actively contributed to open-source projects as a participant in GirlScript Summer of Code 2024, enhancing project development and fostering community collaboration

LANGUAGES

English, Hindi, French
